

# MSE in a nutshell

Iago MOSQUEIRA  
Maritime Affairs Unit - IPSC  
European Commission  
Joint Research Center

## What is MSE?

- A.K.A. Management Procedure Approach

*Assessing the consequences of a range of different management strategies to determine which one will be the most appropriate to meet the operational objectives of the fishery.*

- Robustness against uncertainty
- Compare rules
- Include all knowledge

## Some history

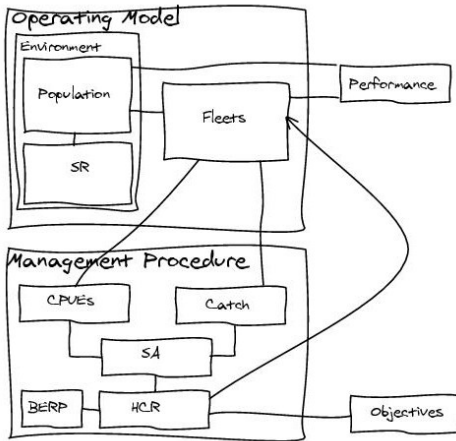

- IWC Revised Management Procedure

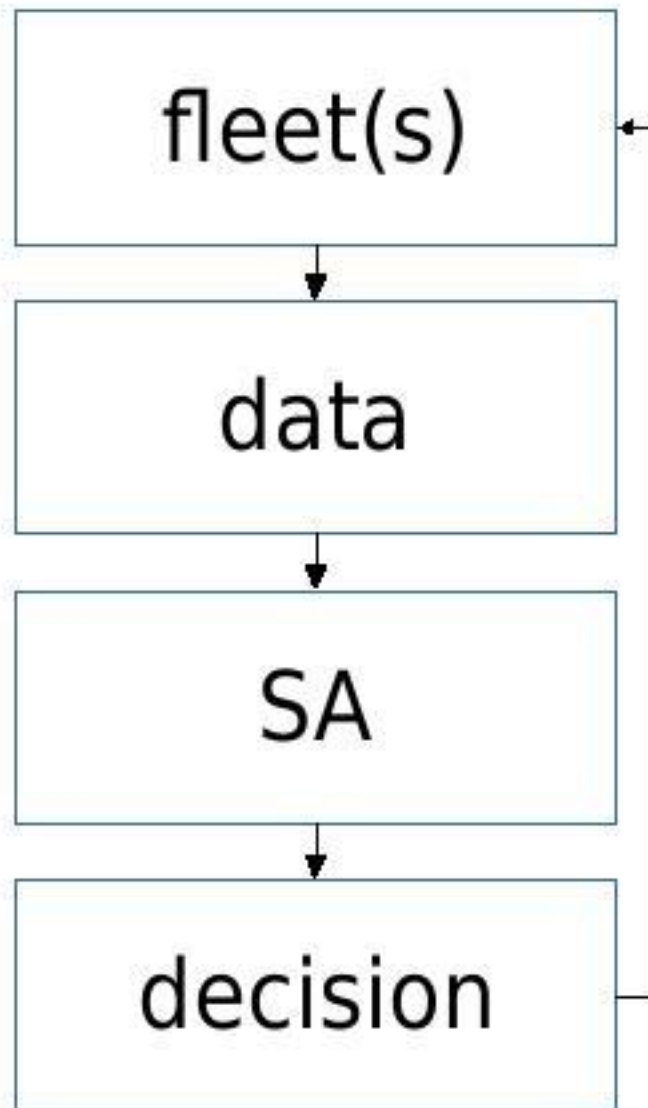

- SBT Management Procedure
- SA, NZ, AUS

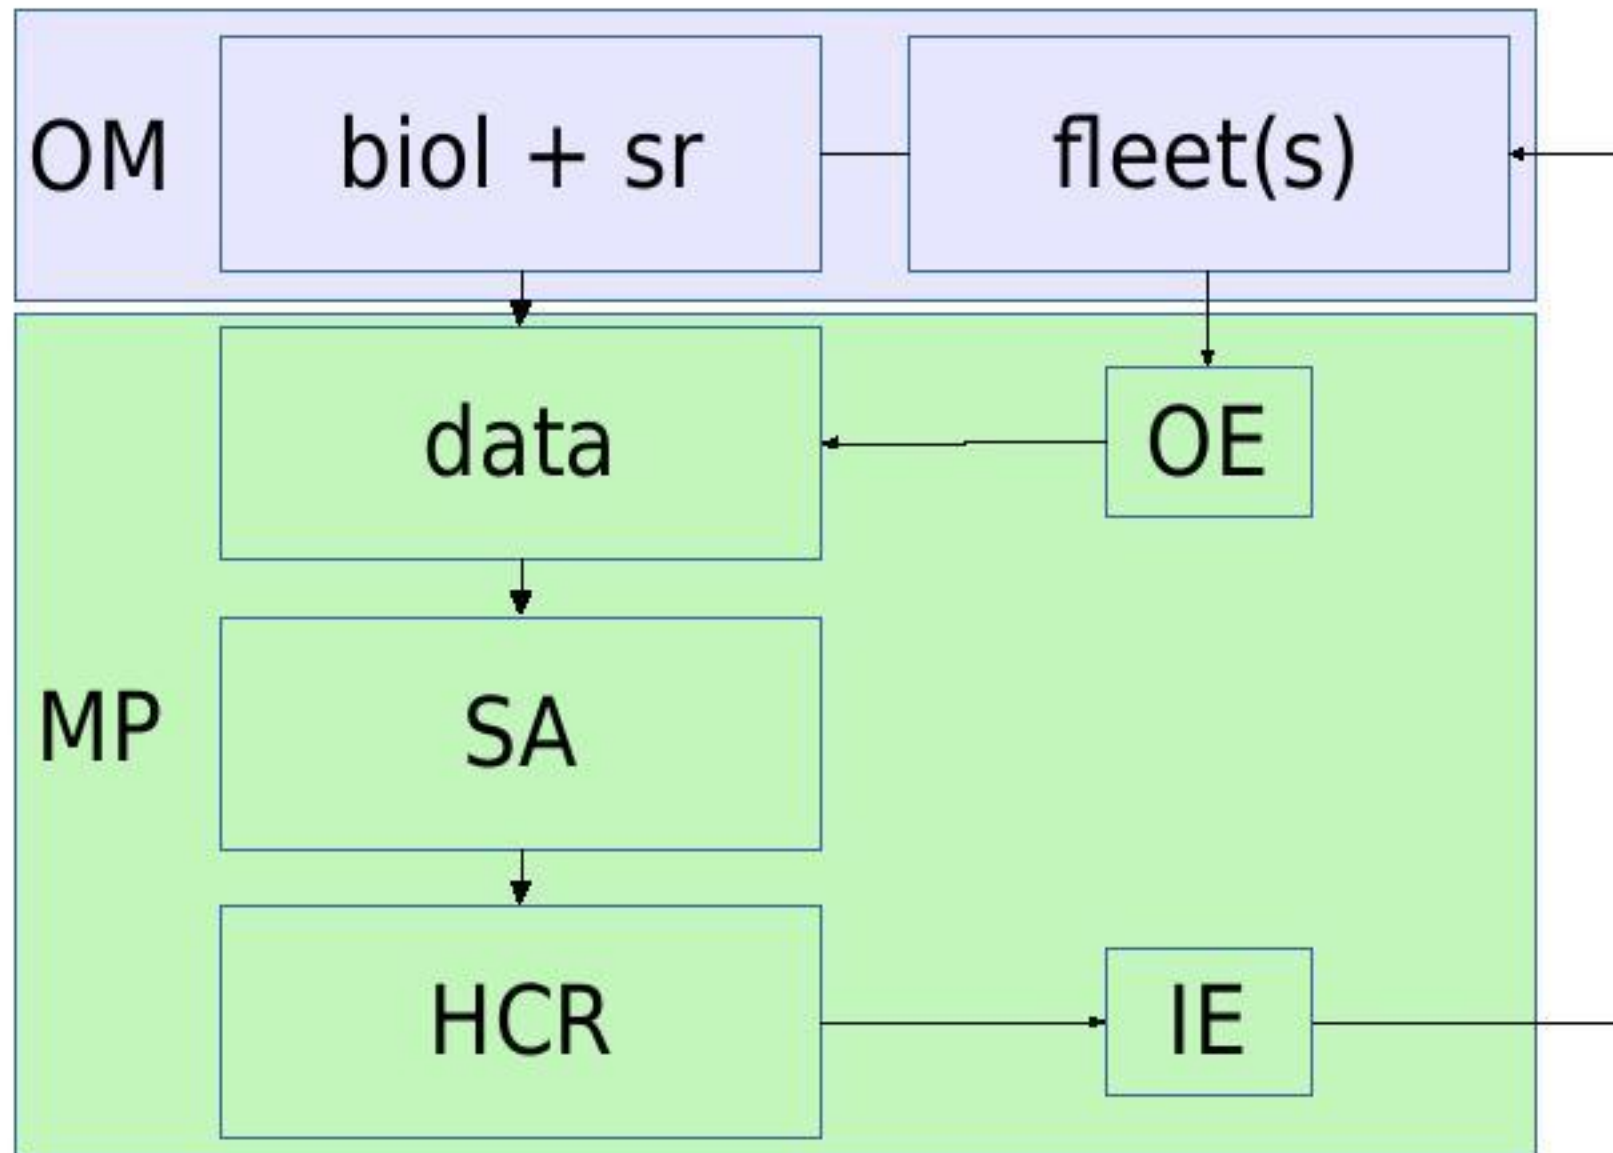

## Fishery system model

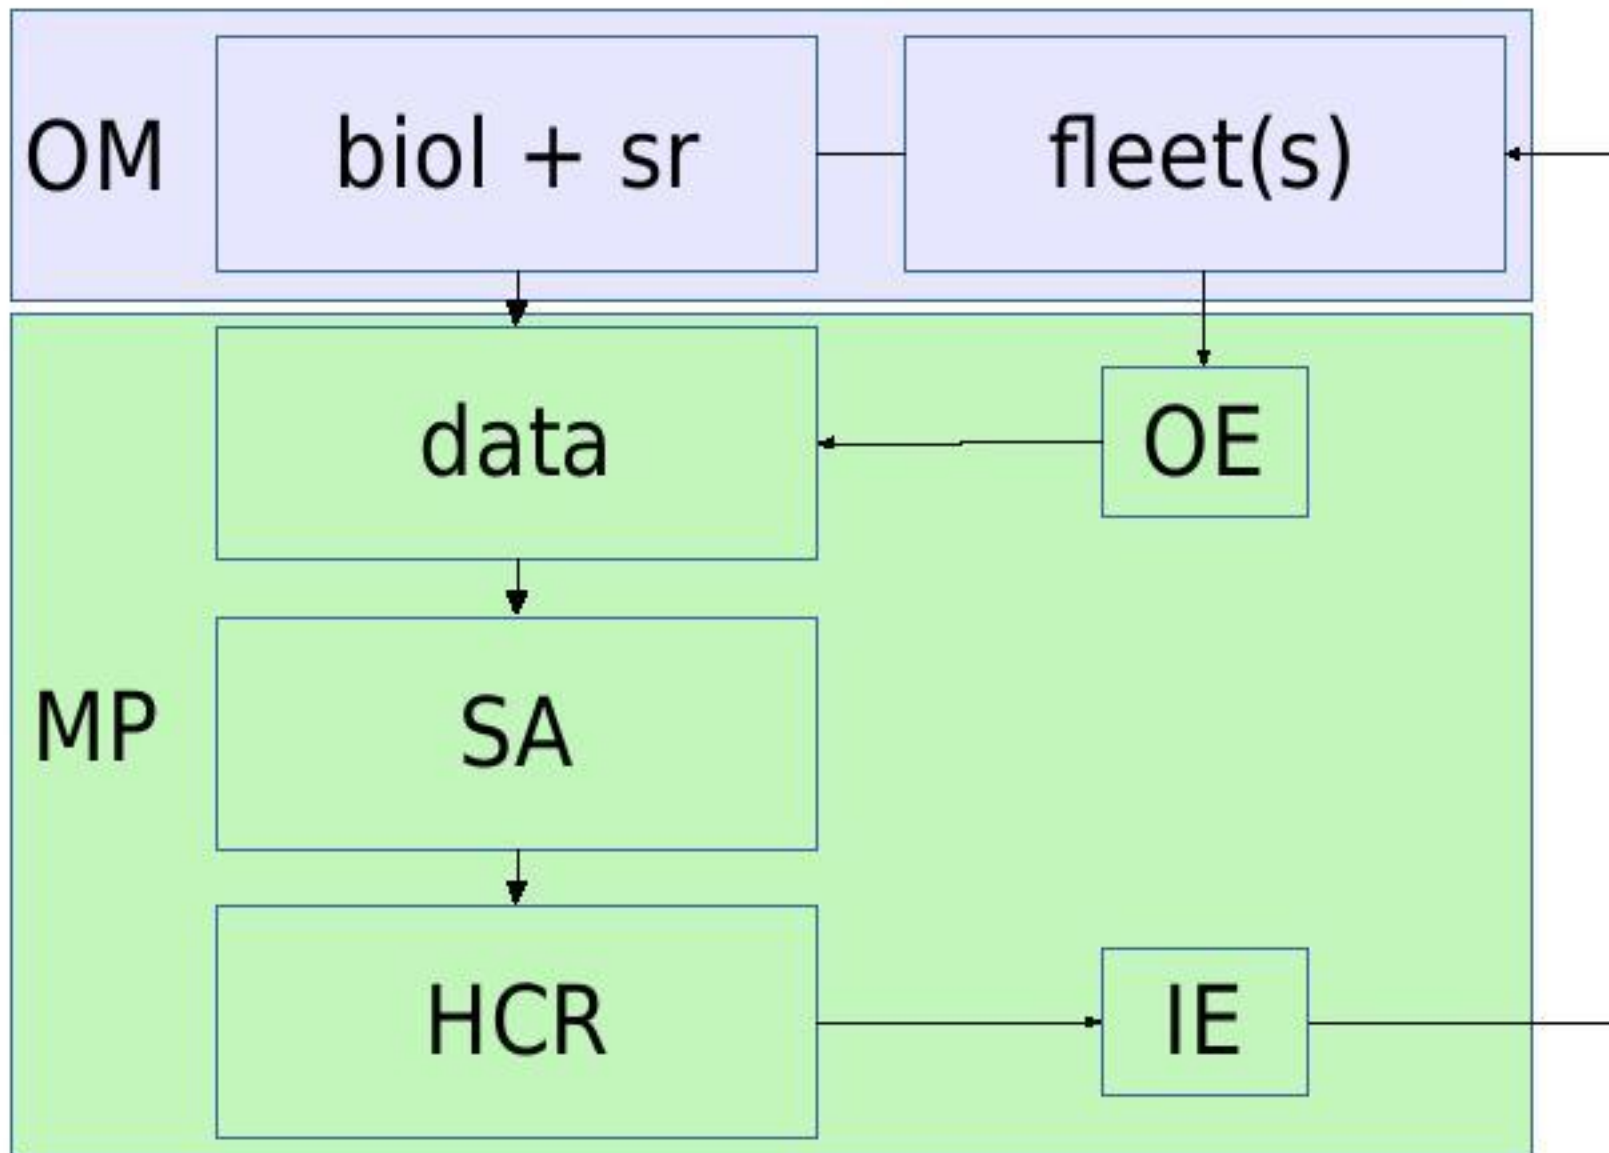

## Steps to MSE

- Define and agree on **objectives & limits**
- Identify appropriate **Management Procedures**
- Define a set of **Operating Models**
- Conduct **simulations**
- **Summarize** performance
- Select **best MP**

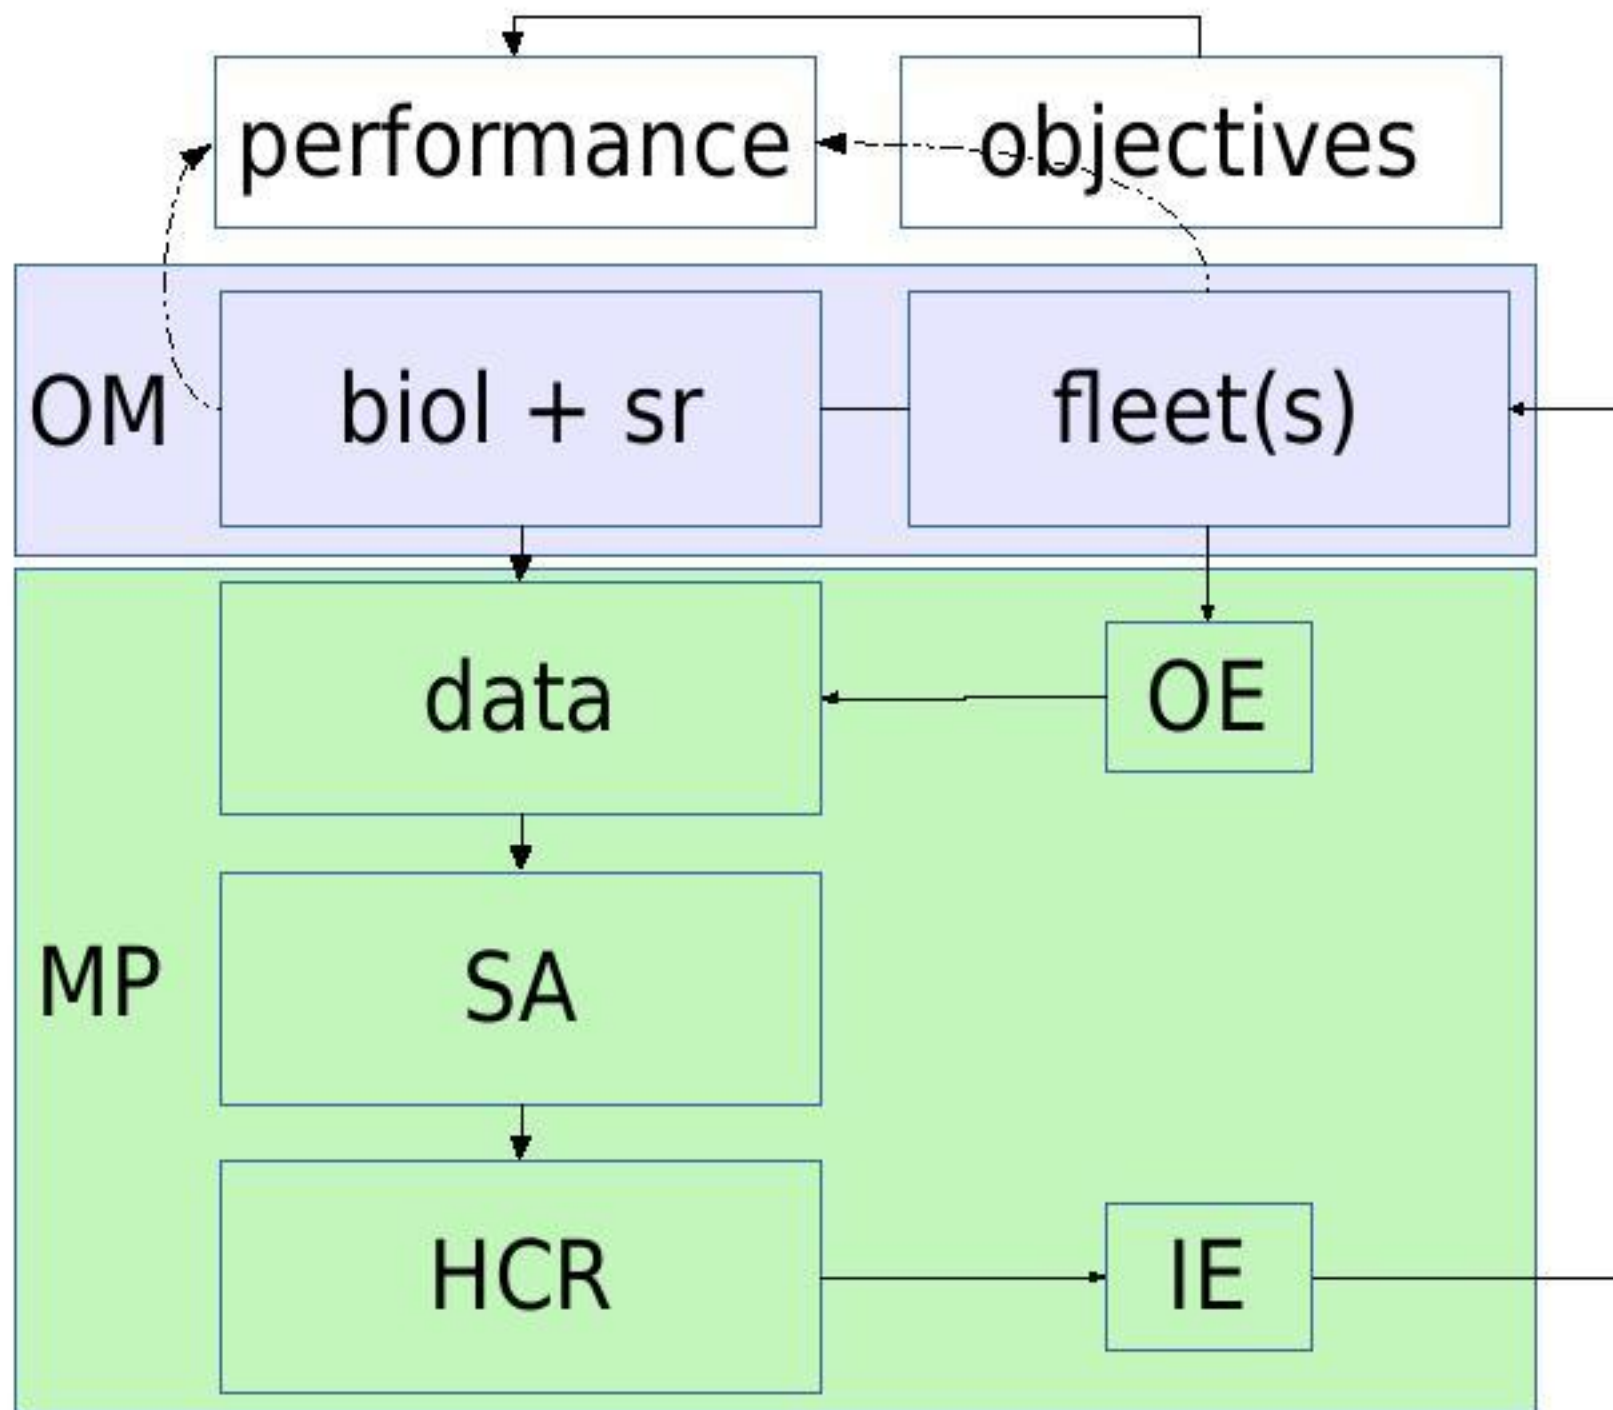

objectives

# Specify & prioritize **objectives** ...

# Specify & prioritize **objectives & limits**

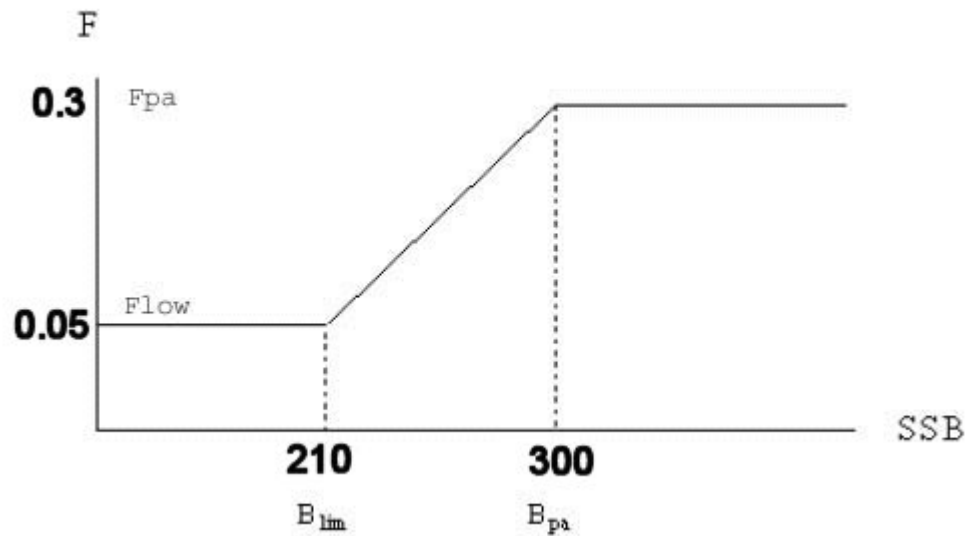

# Specify & prioritize **objectives & limits**

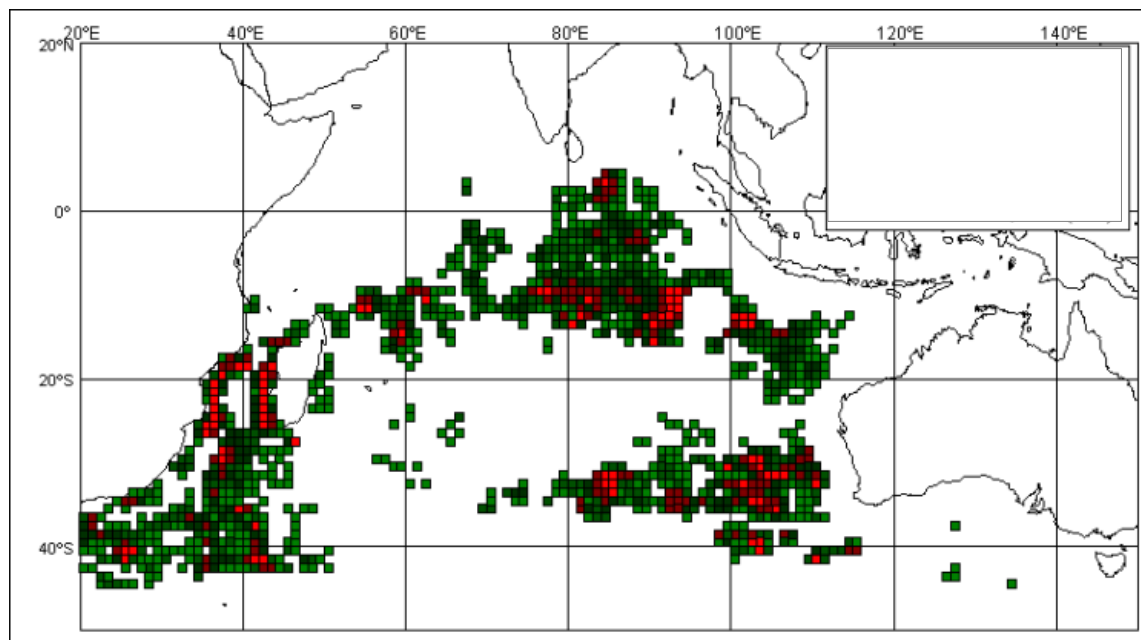

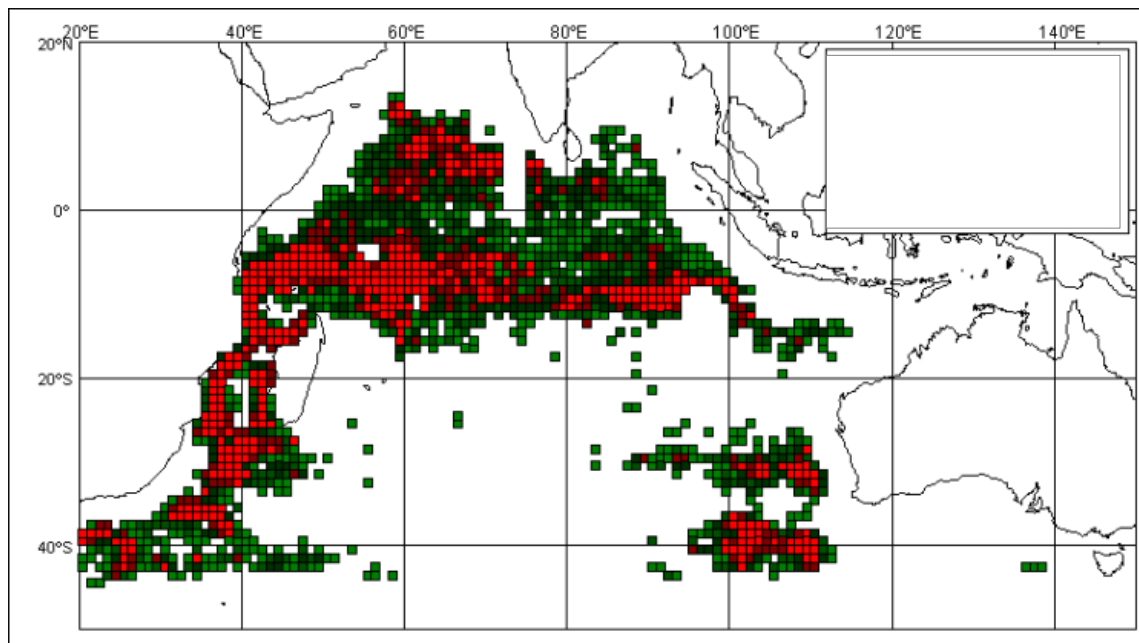

# Quantify performance measures

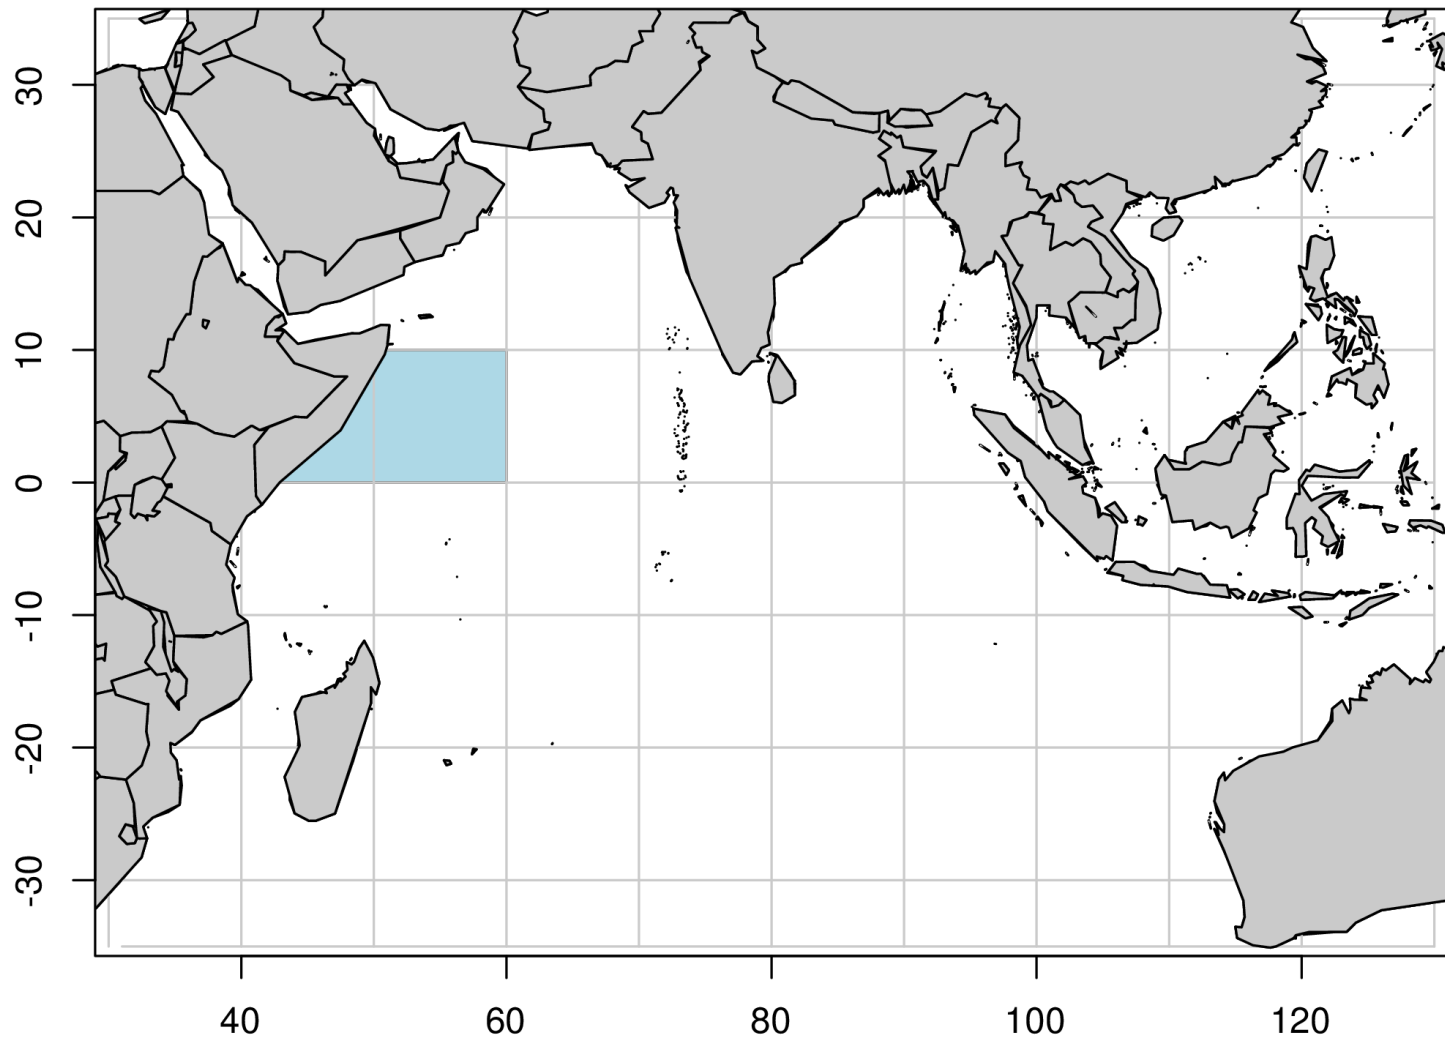

# Identify Management Procedures

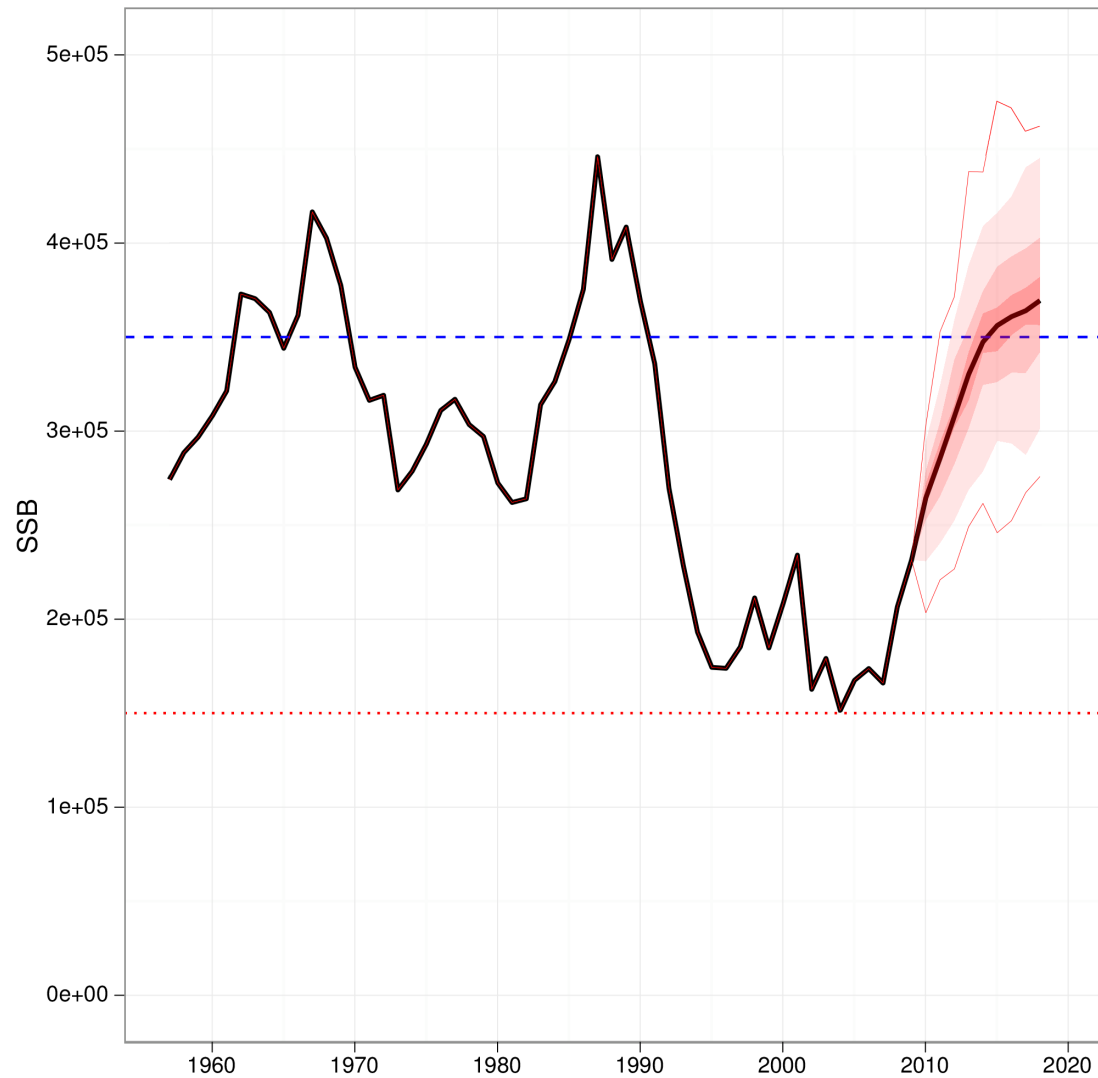

Effort management

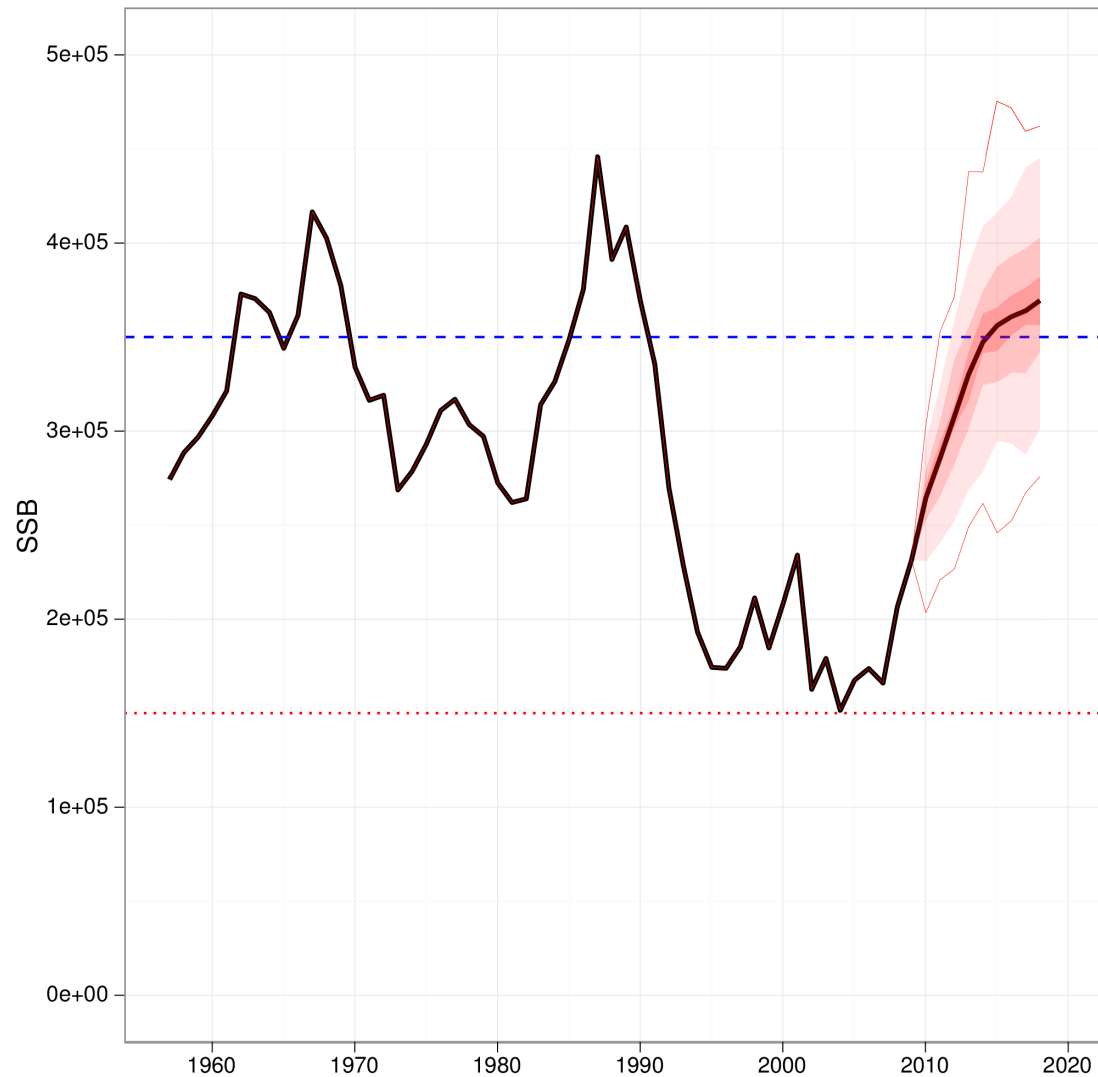

Closed areas/seasons

# Conduct simulations

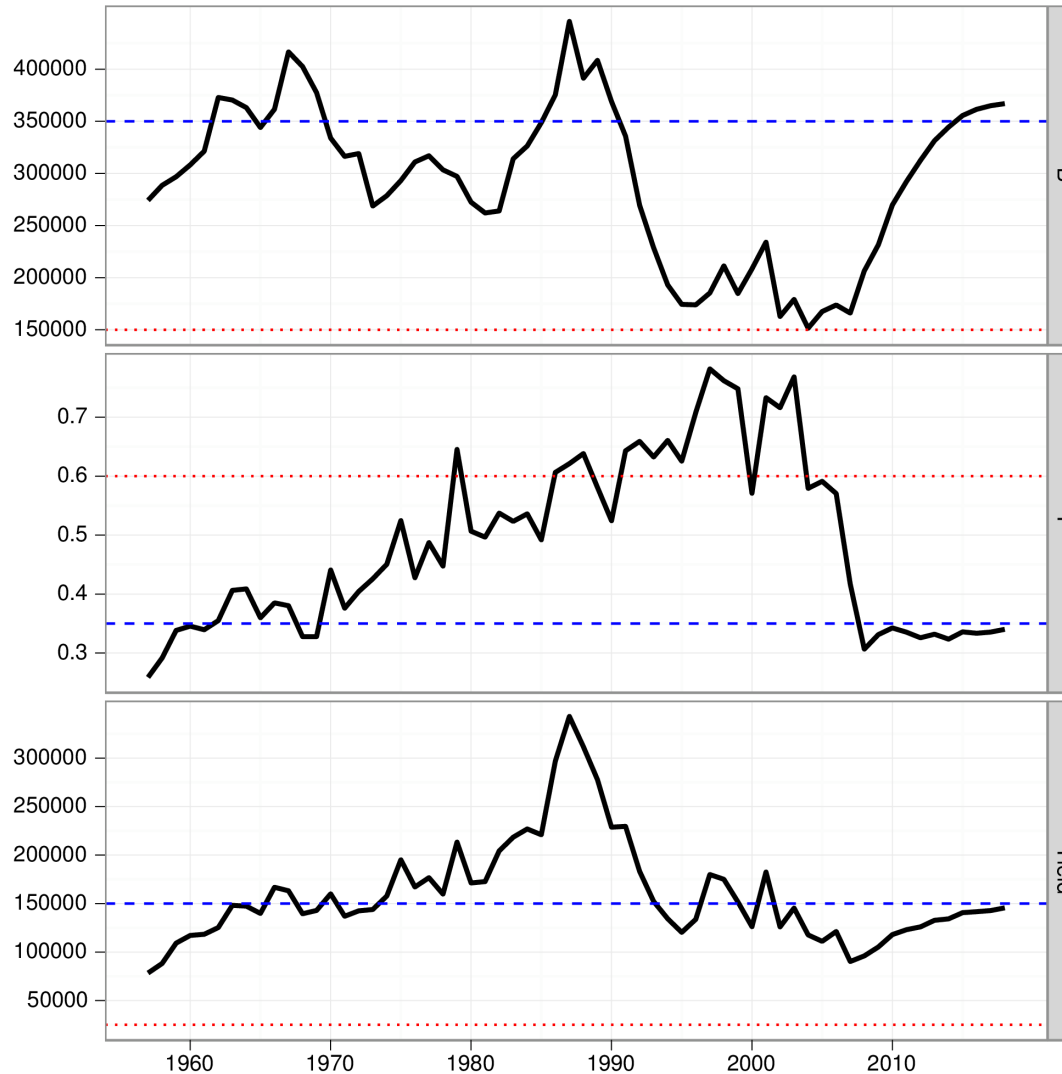

# Conduct simulations

**69%**  
 **$B > B_{MSY}$**

**0%**  
 **$B < B_{lim}$**

# Summarize performance of MPs

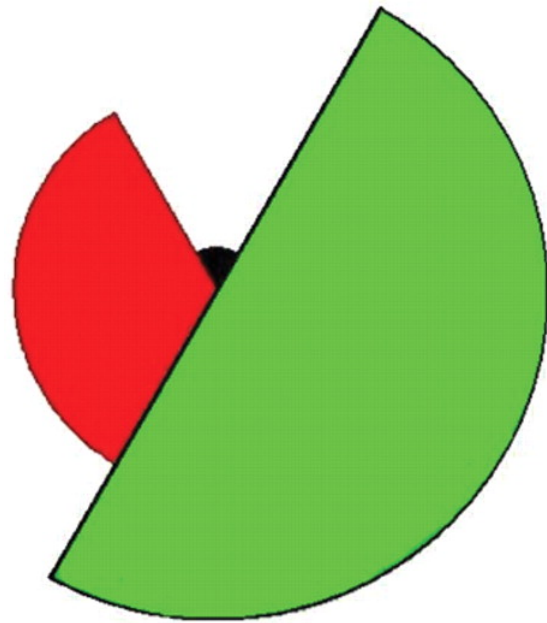

**69%**  
**B > BMSY**

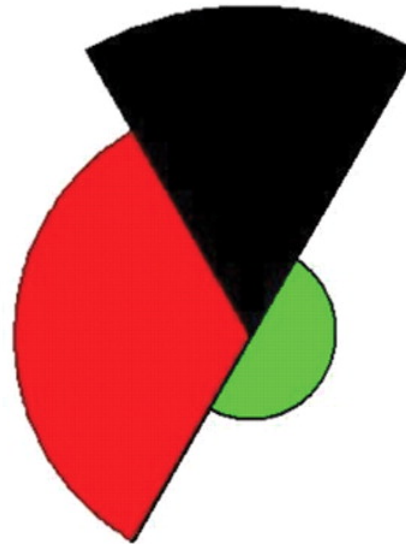

**32%**  
**F > FMSY**

**56%**  
**Y >= MSY**

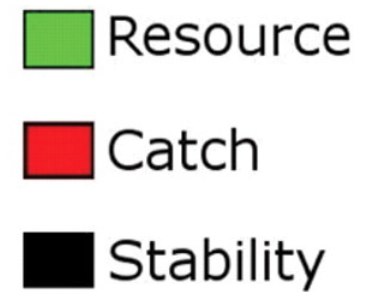

# Select best MP

*modFree*

*rbPlan*

## Advantages

- Avoid yearly variability in SA
- Long-term trade-offs
- Less haggling
- No 'wrong' best assessment
- Default decision
- Risk on board
- Consistent with PA
- Interaction across the table

## and disadvantages

- Results dependent on model
- Lengthy development
- Data still essential
- Overly rigid
- Autopilot
